Let Betco be your single source manufacturer.
BETCO Gold 14 & 18 Vacuums

1. Safety check the cable and plug before starting.
2. Check the brush and remove any string or debris which may be wrapped around the brush.
3. Check that a bag is fitted and is in good condition.
4. Plug the vacuum in to the power outlet.
5. Adjust the brush height to suit the carpet thickness. There are 4 settings; a setting of 1 allows maximum contact of the brush with the carpet.
6. Turn the main power switch on. The main vacuum motor will start.
7. Hold the handle and depress the red foot pedal. This will allow the handle to be lowered to a comfortable working position and at the same time, start the brush motor.
8. Vacuum the floor.

Using the Wand

1. Return the handle to an upright position.
2. Remove the wand by pulling it backwards and upwards. When the wand is removed the brush motor will stop automatically.
3. Use the crevice or upholstery tool as required.
4. After use, return the wand to its original position, ensuring that it fits correctly.

Dust Bag Full

1. This vacuum is fitted with a red “Bag Full/Blocked Hose” indicator. It will light if the air flow is obstructed.
2. If the light comes on, switch off and check the dust bag. If the dust bag is full, replace it with a new bag. If the bag is not full, check the wand to ensure it is not blocked.

Dust Bag Replacement

1. Open the door by pulling the door latch.
2. Hold the top of the dust bag with one hand and with the other, pull the bottom of the bag down and out. Seal the bag using the flap.
3. The vacuum cannot be closed until a new bag is fitted. Always fit a new genuine BETCO dust bag.

Changing the Inlet Filter

1. Remove the bag as described above.
2. Twist the filter cage anti-clockwise and lift.
3. Replace the filter with a new genuine BETCO filter and replace the filter cage.

CAUTION! Do not use the vacuum without an inlet filter.

Warning Lights

1. This vacuum is fitted with a 3 color warning lamp. This lamp operates when the brush motor is working.
2. The GREEN lamp indicates that the brush is working correctly.
3. The ORANGE lamp indicates the drive belt is broken.
4. The RED lamp indicates that the motor has stopped.

Belt and Brush Replacement

1. Turn the machine upside down and align the two clips with the front edge of the vacuum.
2. Lift off the brush cover and remove the brush roll.
3. If required, fit a new belt around the motor spindle and the toothed wheel on the brush roll.
4. Ensure that the rubber end caps are seated properly and refit the brush roll in the sockets.
